With this letter, I would like to express my deepest interest in the position of Fullstack .Net Developer and the reasons why I believe I am the right candidate for it. I genuinely find this job more than exciting and see it as a fantastic opportunity to take my knowledge into use as I learn and grow. When I was reading the job ad for the first time, the closer I got to the end, the more excited I felt about it since there is a great match between my profile and the requirements.

As I hold a Bachelor's degree in software engineering and an MSc in artificial intelligence, I have hands-on experience working with various types of technologies and frameworks and architectures such as web API, SignalR, MVC, microservices architecture, React Js, and so on. Nonetheless, I do believe that my experience in developing new features will help your company.

I have been working with .net framework and making an effort to gain more expertise and learn new stuff. So, your company can provide a great opportunity for me to use my knowledge to grow up your applications and your services.

I would like to thank you for your time in reading this letter and feel free to contact me at the given email address above.

Best regards,

Vahid Alizadeh
